Kolkata, West Bengal - 743331, India

OBJECTIVE

Software Developer with hands-on experience in building secure, user-friendly web and mobile applications using Java and the MERN stack. Demonstrated ability to lead projects from concept to deployment, with a focus on modern standards and scalable solutions. Eager to contribute to innovative teams and create technology that makes a meaningful impact.

SKILLS

- **Programming Languages:** C, SQL, Java, Python, JavaScript
- **Web Technologies (Front-End):** HTML5, CSS3, React, Vite
- **Web Technologies (Back-End):** Express.js, Node.js, REST APIs, JWT authentication
- **Database Systems:** OracleSQL, MongoDB, PostgreSQL
- **Tools & Technologies:** Git, GitHub, Postman, Render, Vercel, Linux, Excel, Cursor, Windsurf, Google Colab
- **Core CS:** Database Management System, Data Structures and Algorithms, Object Oriented Programming
- **Software Testing:** Manual, Automation with Java Selenium
- **Soft Skills:** Team Collaboration, Communication, Problem solving

EXPERIENCE

- **AILabs**  June 2025 - July 2025
Back-End Development Trainee Kolkata, India
 - Contributed to developing an Event Management System for 2+ academic institutions
 - Implemented MERN stack features, enhancing system scalability and robustness by 15%
- **Webel**  July 2024 - August 2024
Cyber Security Trainee Kolkata, India
 - Delivered 2+ professional security solutions for individual and business clients
 - Developed website security mechanisms, reducing risks of SQL injection by 12%

PROJECTS

- **MedAlert — Smart Medicine Reminder & Stock Alert System** July 2025 - May 2026
Tools: React, TypeScript, Node.js, Express.js, MongoDB Atlas, Rest API, Gemini API [Live Demo] 
 - Architected and shipped a full-stack healthcare platform with 20+ REST API endpoints across 5+ route modules and 3+ data models, serving multi-role users with real-time medication & stock tracking and expiry alerts
 - Engineered multi-channel notification system with automated scheduling via Agenda worker process, averaging 65–175 ms API response time
 - Integrated Google Gemini AI assistant with streaming SSE(Server-Sent Events), real-time tool-calling actions, and live MongoDB medicine data queries
 - Built a secure RESTful API with JWT authentication, RBAC — achieving 95.23% statement coverage on all 3+ mongoose models with Jest integration tests, and 100% pass rate across 5+ test cases covering auth modules
 - Achieved 95.23% model test coverage with 7/7 passing Jest integration tests; automated via GitHub Actions CI/CD on every push
- **Event Management System: A System to Organize and Track Events** June 2025 - July 2025
Tools: React, Node.js, Express.js, Socket.io, MongoDB, Rest API [Live Demo] 
 - Built a full-stack MERN application with 2 role-based access levels (Admin & Student) secured via JWT authentication and bcrypt password hashing
 - Designed and deployed 16 REST APIs across 4 route groups with global error handling, input validation, and role-based middleware protection
 - Implemented QR code-based attendance system — unique code per registration prevents duplicates, with real-time admin scanning interface
 - Enabled Excel export of all registration data using ExcelJS and added event capacity management with automatic waitlist functionality

EDUCATION

- **The Neotia University** July 2022 - August 2026
B.Tech in Computer Science and Engineering with Specialization in Cyber Security Kolkata, India
 - CGPA: 8.37/10.00
- **Ramkrishna Mission Siksha Mandir (HS)** Mar 2022
Higher Secondary Education Kolkata, India
 - Grade: 81%
